The World Off Road

Akis Temperidis and Vula Netu have been on an epic journey for over an year now which, when it ends 800 days after they first set off from Greece, will have taken them through 80 countries in 5 continents. On the way they've seen some of the best landscapes our planet has to offer ? from the deserts of Africa and the Paris-Dakar route to Senegal to the magnificent Himalayan lands in Leh. Their drive around the world in a prepped Land Rover Discovery TDV6 is an inspiration to one and all, and a tribute to the awesome spirit instilled in this wonderful Greek couple. Here's a brief account of what they've seen - a small collection of great pictures clicked by the couple themselves.

Other Slideshows

Fiat 500
The original Fiat 500 was one of the cheapest production cars in the world when released in 1957, whereas the new 500 is the second most expensive car in its class behind another icon reborn, the MINI.
8 slides

Ford Model T
Henry Ford's baby, the Model T was the first automobile to be mass produced on an assembly line thanks to some innovative thinking by the daring businessman.
12 slides

BMW GINA
GINA stands for "Geometry and Functions in 'N' Adaptations", which means that designers from both BMW and BMW Group DesignworksUSA were allowed to throw out the rulebook.
9 slides

Royal Enfield Himalayan Odyssey
The beautiful scenic roads enroute to Chandigarh and Manali to Ladakh were truly a rider's delight.
